The package *nmbib* allows several kinds of citations: author-year parenthetical \citep: (Daly, 2007), author-year textual \citet: Kopka and Daly (2003), authors only \citeauthor: Daly, year only \citeyear: 2009, numerical \citenum: 5, \citealn: [6]. The \citeall command produces the full citation: Markey (2009) [7], close to the one produced by the *multibibliography* package (Cohen et al., 2013a,b).

Full citation command \citeall: Cohen et al. (2013a) [6]; Cohen et al. (2013b) [8]. The starred form: \citeall*: Cohen, Haralambous, and Veytsman (2013a) [6]; Cohen, Haralambous, and Veytsman (2013b) [8]

We can create links with a user-level universal command \nmbibLink: Daly's package in the alphabetic list, Kopka and Daly's book in the sequential list.
