Table of Contents

1 Feature Description 1
1.1 Introduction 1
1.2 New and Enhanced Features in MK7.3 2
1.2.1 CORDS Project Enhancements 3
1.2.2 Clock and Timer Extensions and Improvements 4
1.2.3 Debugger Enhancements for Multi-Threaded Programs ... 5
1.2.4 POSIX-Compliant Access to Real-Time Services 6
1.2.5 MK Scheduling Framework and Scheduling Policies 10
1.2.6 Experimental Trans-Node RPC 14
1.2.7 Myrinet Support 14
1.2.8 Restructuring and Clean-Up 15
1.2.9 Test Programs 15
1.3 Collocated Servers 15
1.4 Asynchronous Driver Model 16
1.5 Real-Time Extensions 16
1.5.1 Preemptible Kernel 17
1.5.2 Synchronizers 17
1.5.3 Real-Time Threads (rthreads and pthreads) 17
1.5.4 Extended Real-Time Thread Control Semantics 18
1.5.5 RPC Kernel Interface 18
1.6 CORDS 19
1.6.1 CORDS Evolution 20
1.6.2 LTS 21
1.6.3 GIPC 21
1.7 Microkernel Performance Suite 22
1.8 Event Trace Analysis Package 22
1.9 IP Multicast 23
1.10 New Kernel Device Drivers 24
1.11 Reference Papers 24

2 Installation Notes 29
2.1 Introduction 29
2.2 Reference Platform Definition 29
2.2.1 System 30
2.2.2 Video/Monitor 30
2.2.3 Memory 30
2.2.4 Disk Controllers/Host Adapters 30
2.2.5 Disk 31
2.2.6 Tapes 31
2.2.7 Ethernet 31
2.2.8 FDDI 31
2.2.9 Myrinet 32
2.2.10 Floppy 32
2.2.11 Graphics Controllers 32
2.2.12 High resolution Monitors 32

2.2.13 "In-kernel" CORDS: (MK 7.2+ only) 32
2.2.14 Miscellaneous 33
2.3 MK 7.3 Distribution Tape 33
2.4 Binary Installation 34
2.4.1 Preparation for Binary Installation...................................35
2.4.2 Binary Installation Process 36
2.5 Source Installation 42
2.5.1 Extracting Files from the Distribution Tape 42
2.5.2 Building the Release 43
2.5.3 Installing and Booting the Built Images............................48
2.6 Common Problems 50
2.7 Supplemental Information 50
2.7.1 Ethernet Board Configuration 51
2.7.2 Debugging {with} MK 51
2.7.3 MK Paging 52
2.7.4 Sample Disk Partition Table 52

3 MK7.3 Known Problems 55
3.1 Introduction 55
3.2 Kernel 55
3.3 MK Server 59
3.4 Commands 61
3.5 Libraries 62
3.6 Unidentified 62

4 Kernel API Changes 65

<u>General Microkernel Interfaces</u>
mach_port_get_attributes 68
mach_port_set_attributes 70
mach_port_status 72
task_set_port_space 74
vm_allocate_cpm(2) 75

<u>Server Collocation</u>
mach_subsystem_create 80
mach_port_allocate_subsystem 82
thread_activation_create 84
mig_stub_routine 86
routine_arg_descriptor 87
routine_descriptor 88
rpc_subsystem 89

<u>Device Driver</u>
device_get_status 92

device_read_async 94
device_read_async_inband 96
device_read_overwrite_async 98
device_write_async 100
device_write_async_inband... 102
io_done_queue_create 104
io_done_queue_terminate 105
io_done_queue_wait.. 106
io_done_result 108

MultiComputer Support
norma_node_self.. 112
norma_task_teleport.. 113
task_set_child_node 115

Real-Time Support
lock_acquire... 118
lock_handoff 119
lock_handoff_accept.. 120
lock_make_stable 122
lock_release... 123
lock_try 124
lock_set_create.. 125
lock_set_destroy 127
semaphore_create... 128
semaphore_destroy 130
semaphore_signal 131
semaphore_signal_all.. 132
semaphore_wait 133
mach_rpc_trap... 134
mach_rpc_return_trap 136
mach_rpc_signature 137
thread_get_sched(2).. 138
thread_set_sched(2) 140

Event Trace Analysis Package
etap_config(1).. 144
etap_md(1) 145
etap_mscan(1)... 147
etap_resize(1).. 148
etap_status(1).. 149
etap_trace(1) 150
etap_new_probe(2).. 153
etap_probe(2) 155
etap_trace_event(2)... 157

etap_trace_thread(2) 159

Clocks and Timers
clock_mgt(2) 162
ntp_adjtime(2) 164
ntp_gettime(2) 165
clock_gettime(3) 166
clock_settime(3) 168
timer_create(3) 170
timer_delete(3) 172
timer_gettime(3) 174
timer_settime(3) 176
time_stamp_counter(3) 178
uclock(8) 180

CORDS and Communication
prottbl(4) 186
rom(4) 187
abcasttest(8) 188
balldemo(8) 189
demo_client(8) 195
dtime_mgmt(8) 197
gipc(8) 200
udpiptest(8) 201

Microkernel Support
latency(1) 204
sysversion(1) 205

IP Multicast
IP Multicasting 208
Sending IP Multicast Datagrams 208
Receiving IP Multicast Datagrams 211
Sample Multicast Program 212
