6 Bug Fix

[2.0.00.81.11b2]

Index	Description
1	[050317941] P652HW31 cannot apply data to Vantage after CNM upgrading from 2.0 to 2.1.
2	[050317953] haha.xml will exist in Vantage folder.
3	[050317954] System >> Maintenance:Backup to server in CNM 2.0, after upgrading, backup file will disappear.

[2.0.00.61.11]

Index	Description
1	[041019489] Create CSR in System>>Certificate Management, fill "/as\as" in Organization Unit/Name and Locality/State Name; Click apply, Error will be shown in vantage.output
2	[041019492] Vantage resets ADSL line continually when click device in OTV.
3	[041019493] P650R-31 and P650R-33 ADSL monitor is disabled in menu.
4	[041021652] System>>log will show duplicate log info when synchronize in device override vantage mode.
5	[041021655] When click purge in system>>logs>>CNM server, you can see a web with two check boxes in it. Vantage will send "FwReport Purge" letter when you click apply button, even though the check boxes are un-selected.
6	[041021660] System >> Maintenance >> Management: select nothing in backup file list, click delete, this page will turn to vantage error page.
7	[041022666] Configuration >> WLAN >> Wireless: There should be a dash between A and F. You can find the picture in attached file
8	[041027755] Configuration>>General>>System: there are three items in drop down boxes of First DNS Server, Second DNS Server and Third DNS Server. The item "User Define" should be "User Defined".

9	[041029888] The content of report in Configuration>>Device alarm is wrong.
10	[041101019] P652HW31 should have 32 MAC Filter rules.
11	[041104140] Configuration>>Firewall: When you add an ACL rule, you can add your customized source address. In the customized source address menu, there should be a default value 0.0.0.0 in the field which you want user to configure.
12	[041104172] Configuration>>VPN>>Tunnel IPSec Detail: The spelling of item's name in this menu is wrong; you can find the picture in attached file.
13	[041115478] In Vantage CNM >> Device >> Registration, select the Import a XML batch registration file, then import a xml file which contains many devices' configurations (for example, 300 devices'), then in the Import page, go to page1 and select all, and then jump to page2,then jump back to page1, unselect some devices, click the finish button, the result is that all the devices in page1 was registered.
