“The role of dialogue and networking:
From a transitional to an industrialized country”

Transfer, Research and Training, Medical College

TAP NGUYEN VAN*

**Hue Medical College, Dpt. for Scientific Research - International Relations / Dpt. for Public Health*

Abstract

1. Rationale:

Hue medical college has had a few co-operation relations in training and medical scientific research with Germany, the Netherlands, America; but the results from these co-operations have not matched the college needs.

This college co-operational relations with some partners or organizations such as: German Academic Exchange Service (DAAD), Catholic Academic Exchange Service (KAAD), German Foundation for International Development (DSE), Freiburg University, ... by supporting some young candidates studying in some Institutes in Germany or by supporting a few medical equipments in the field of reproductive health. These co-operations have not extended to the activities of the training, the workshop in Hue, Viet Nam or scientific research exchanges in others fields such as: the public health, infectious diseases, microbiology, etc.

2. Objectives:

Determining the obstacles in the co-operation relations to strengthen the training and scientific research activities in Hue medical college.

3. Methods:

- Collect the information through deeply interview and focus group discussion with management officials, people responsible for the international affairs, scientific staff.
- Statistic and analysis the results of the projects on outline, effects, efficiency and the project maintenance.
- Discussion to find the solutions to finding feasible partners or to solve the obstacles.

4. Results:

Determining the obstacles:

- on the partner side,
- on Hue medical college side,
- finding feasible partners,
- on social policy; mechanism for international relation,
- in the projects opening such as: Design objective, planning, implementing or financial solving.

in period of the transitional social.

Proposing some solutions to solve that obstacles and improving the efficiency of the collaboration.

5. Conclusion:

- It is necessary to work closely to the both sides (between Hue medical college with the international organisations in Germany) to find out some suitable mechanisms

of social policy and to determine the priority needs to solve the problems on the international collaboration.

- Opening and strengthening the contact with international organizations and partner.
- Maintenance (keep in touch) the relation closely with the partners.
